1 Category: Lotteries in Malaysia I am pleased to announce that the SDRA is partnering with the University of Texas, MD Anderson Cancer Center to offer a new course titled "Histomorphometry and Tissue Staining". The course will take place in Austin, Texas. Beginning July 21, 2017, the course will take place every other week for five weeks. Faculty members from MD Anderson Cancer Center will be joined by faculty from the University of Texas (UT). This is a new course where a core curriculum was developed on the job site by editors of the journal and is based on current methods and best practices. Throughout the semester, attendees will review current histomorphometry and tissue staining issues and techniques. This course would be offered free of charge to attendees interested in histomorphometry and/or tissue staining. However, registration is required. If you are interested in learning about histomorphometry and tissue staining and would like to participate in this new course, please contact Anthony Beall at Dr. Beall's SDRA email Share this: Like this: 2 Comments [...] kept up," says Anne-Marie Favre, "and that's something that we hear quite often from our users."—Click to Tweet Below, we like to hear what [...] [...] team.
