I am using win 10, and I don't know why I can't run GTA IV properly with the latest patch, I can run GTA V on Medium/High (almost everything on high, but some options on medium) and I get 40-50 FPS, and on GTA IV in Patch 8 I don't know why, I get less than 30. And on the Patch 4 on Medium/High I get 50-60. Here is how you can reinstall. After installing patch you might have some problems because some files have not been installed correctly.

- 1) Uninstall the game
- 2) Install patch 1.0.8.0.
- 3) Open the GTA folder and there should be a "GTA IV\" folder. Inside the "GTA IV\" folder there should be a "Data\" and "GTAIV\" folder.
- 4) Copy "GTA IV\" folder from GTA IV to the "Data\" folder
- 5) Copy GTAIV.reg from GTA IV to the "GTAIV\" folder.
- 6) Open the GTAIV.reg file.
